ESSENTIAL™ COLLECTION
LARGER SIZES NOW AVAILABLE

ESSENTIAL™ COLLECTION

Consider the Marvin Essential collection for your single family residential, multi-family, and light commercial projects. Essential windows and doors feature clean, contemporary profiles, a proprietary acrylic finish up to three times thicker than the competition, and the unmatched strength of Ultrex® fiberglass.

ULTREX STRENGTH:

Ultrex fiberglass is the strongest window-framing material in the industry. It also expands and contracts at the same rate as glass to minimize seal failures, leaks, and cracks.

SUPERIOR FINISHES:

Our proprietary acrylic finish meets AAMA 624 and allows us to confidently offer dark finish options that resist UV degradation or fading up to 5 times longer than vinyl.

STREAMLINED DESIGN:

Narrow sightlines ensure large, uninterrupted expanses of glass to maximize views and flood rooms with natural light. Ideal for both new construction and replacement.

MULLING CAPABILITIES:

Along with expansive sizes, Essential offers certified assemblies that meet a standard mull DP25 rating and a reinforced mull DP40 rating. Our mulling capabilities bring more of the outside in, creating striking window and door combinations that meet design trends.

Essential products are backed by a fully transferable, 20/10-year limited warranty on glass, materials, and workmanship.

WHAT'S NEW? LARGER SIZES:

Meet your project requirements with larger sizes in casements, awnings, and sliding patio doors.
